

Fluent Wave BV Successfully Passes Recertification Audit for ISO 14001

Heerlen, Netherlands - January 22, 2026. Fluent Wave proudly announces the successful recertification of its ISO 14001 Environmental Management System following a comprehensive audit conducted by DNV. This achievement confirms Fluent Wave's continued commitment to responsible environmental practices, regulatory compliance, and the ongoing reduction of its environmental footprint across operations.

ISO 14001 provides a globally recognized framework for managing environmental responsibilities in a structured and measurable way. The recertification audit evaluated Fluent Wave's environmental objectives, risk controls, operational discipline, and continuous improvement initiatives, demonstrating that the company maintains effective systems to manage environmental impact while supporting long-term business sustainability.

"Environmental responsibility is embedded in how we design processes, manage resources, and make daily decisions," said Bill Ulmschneider, the Managing Director at Fluent Wave. "Maintaining ISO 14001 certification challenges us to continuously improve our performance, strengthen compliance, and act responsibly for our customers, employees, and the communities where we operate."

Fluent Wave will continue investing in sustainable practices, employee engagement, and performance monitoring to ensure its environmental management system evolves alongside regulatory expectations and industry standards. This recertification reinforces the company's commitment to operating efficiently, responsibly, and with a long-term perspective on environmental stewardship.
